

## FACULTY OF BASIC SCIENCES UNIVERSITY OF WAH

### DEPARTMENT OF BIOSCIENCES

#### Programs Offered

- BS/ BS5 Biosciences with Specialization in Biosciences/Biotechnology/ Microbiology/ Zoology
  - BS Biotechnology (Coming Soon)
  - MS Biosciences / MS Biotechnology/ MS Biochemistry
  - PhD Biosciences
- Contact: Contact: 0300-9847796

### DEPARTMENT OF CHEMISTRY

#### Programs Offered

- BS/BS5 Chemistry with Specialization in Inorganic/ Organic/ Physical/ Analytical Chemistry
  - MS Chemistry (Organic/ Inorganic/ Physical)
  - PhD Chemistry
- Contact: 0300-9039212

### DEPARTMENT OF MATHEMATICS

#### Programs Offered

- BS/BS5 Mathematics (Specialization In Computational Math with Artificial Intelligence)
  - MS Mathematics (Weekend Program)
  - PhD Mathematics (Evening Program)
- Contact: 0333-5219010

### DEPARTMENT OF PHYSICS

#### Programs Offered

- BS/BS5 Physics (Specialization in Computational Physics)
  - MS Physics
  - PhD Physics
- Contact: 0333-9979929

### DEPARTMENT OF STATISTICS

#### Programs Offered

- BS/BS5 Statistics (Specialization in Data Analytics)
  - MS Statistics (Evening/ Weekend Program)
- Contact: 0300-5273086

# UW Science Fun-Gamma 2025-26

## ABOUT UW SCIENCE FUN-GAMMA

UW Science Fun-gamma is a national science event organized every year by University of Wah Science Society (UWSS). It is an emersive and dynamic event which provide students from various colleges and universities to explore recent advances in Natural Sciences (Biosciences, Chemistry, Mathematics, Physics, and Statistics). It provides students to share their innovative ideas and collaborate at National level.

Fiftastic celebration of UW Science Fungamma is the ultimate playground of inquisitive minds. Our event is a fusion of fun and gamma rays of knowledge. Igniting the spark of curiosity in every student walk through our doors.

Join us at fiftastic celebration of UW Science Fungamma and embark the journey through the wonders of science guided by passionate experts and filled with laughter and astonishment.

### EVENT DATE:

**Tuesday 31st, March 2026**

# MODULES

## Science Spectacles

From mind-bending physics experiments to fascinating biological phenomenon and dissections, it is a hands-on experience like no other.

## STEM Quest

This Question Based Module is your gateway to the thrilling world of Science. Participants will appear in teams (3-5) to answer the question while the clock ticks away. There will be five separate categories (Biosciences, Chemistry, Physics, Mathematics and Statistics).

## Scienceflix

Stuffed with wonders and knowledge, selected documentaries will be played related to the most interesting and fantastic aspect of everyday science.

## Scientific Palette

Incorporates the concepts of a painter's palette and scientific disciplines, highlighting colorful and creative aspects of science.

## Talent Topia

This audience-favorite module continues periodically to change the taste of technical modules. Students can participate and get the chance to win gifts and prizes.

## Lab Lives

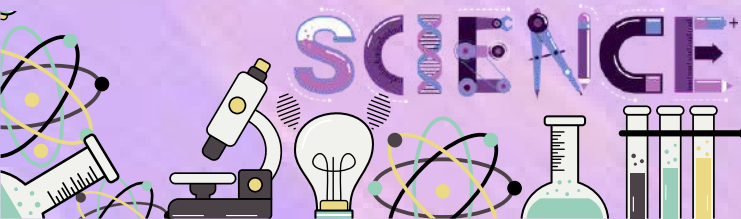

Students from colleges and other universities will visit research labs in groups to get familiar with the research facilities available at University of Wah.

## Myth Vs Fact

Participants are given a scientific statement and must decide whether it is a Myth or a Fact, then briefly justify their answer using scientific reasoning.

## Science on Wheel

This module presents chance for all students alike to witness mind-blowing science experiments and phenomenon, courtesy of Virtual University of Pakistan, offering a hands-on experience, fostering practical skills and understanding of scientific concepts a deeper.

# MODULES

## Science On The Clock

Intellect Insight is designed to assess the participants' scientific knowledge related to Muslim scientists' contributions to the development of science. Teams will be required to guess the personality and invention while being provided the hints needed.

## Science Techathon

Designed to challenge and inspire, this program not only hones problem-solving skills but cultivates a profound understanding of beauty and significance of science. Participants can participate in online mode and will be required to solve and submit quiz in a fixed amount of time

## Scientific Declamation

This module is designed to equip students with skills and knowledge to effectively communicate scientific ideas in 5 minutes through compelling speeches and evidence-based arguments on various topics concerning scientific community globally and Science with AI

## Science Mockups

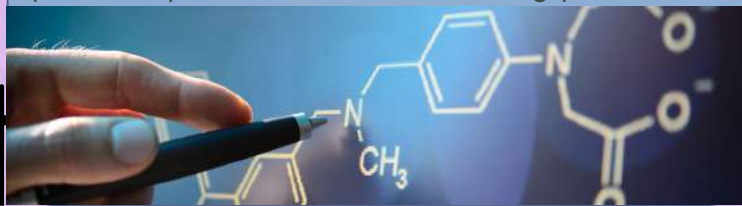

This module will be divided into two types: Poster Presentation and Model Presentation. Participants will display their crafted models and designed posters that represent the forefront of scientific discovery and ingenuity. Size of the poster should be 33x44 inches.

## Scientific Crosswords

This module encompasses an engaging sciencethemed crosswords that cover various disciplines, from biology and chemistry to physics, mathematics and statistics that will put students' problem-solving skills to the test.

## Intellect insight (Let's crack it up!)

Intellect Insight is designed to assess the participants' scientific knowledge related to Muslim scientists' contributions to the development of science. Teams will be required to guess the personality and invention while being provided the

# MODULES

## Scientific Treasure Hunt

Probably the most famous module, participating teams will work through a series of clues and scientific riddles to reach the target and final goal line. Crammed with fascinating puzzles and clues spread across the whole campus, each one leading to the next. To win this module, agility with wisdom will be tested in cracking the clues and puzzles

## Scientific Sketching

A sketching competition that highlights the detailed and visual representations of scientific concepts, processes and to capture the essence of the subject.

## SciCarnival

This audience-favorite module continues periodically to change the taste of technical modules. Students can participate and get the chance to win gifts and prizes.

## SciCycle

This module will be divided into two activities: Junk Design and Miniature Gardening. An eco-friendly activities in which participants will come up with artistic depictions using recycled materials to promote Sustainable Development Goals 12 & 13.

## Organized by

University of Wah Science Society
